

Who uses ArcKit?

Honestly, we don't know.

ArcKit collects no usage data, by design. Nothing phones home. So the only way to find out is to ask.

Tell us your way.

Named

Your organisation, and a line about what you use it for.

Anonymous

Counted by sector only: "a central government department".

Not listed

Only the maintainer knows. It still shapes the roadmap.

What you get back.

Monthly office hours

An open call from October. A short demo, then your questions.

A free pilot workshop

Two hours with your team, on your project or a public test one. Four this quarter.

A case study, if you want one

Your problem in your words. You approve every word.

Two minutes.

Search "I use ArcKit" on the ArcKit GitHub issues page, or follow the link in the post.

Can't post publicly? Message us on Discord or in the ArcKit LinkedIn group instead.
